I definitely like that this game is helping my son learn math.

I'm not sure I like the bigoted attitude he has developed against the number 3, insisting that it always die first.. best car in game. Its alright for now.. Needs more content and races. Compared to DCSS, this doesnt really have a lot of races you can be.. This is a lot of game for the money. Cost me about \$2 on sale and it has lots of gameplay elements and good single player campaign. Its also easy to learn and it gives you objectives and lets you research things so you can upgrade things. You can also slow down or speed up time.

What's wrong with it? It is generic looking. The enemy ships are depressingly generic looking and your buildings are just symbols. Your missiles are okay, but the laser flashes are just too quick and almost invisible. You know they're working because enemies blow up. Once in awhile you might catch a faint blue line. The music isn't much but its good for a late night mood.

It seems like they spent most of their money on creating the campaign and it was worth it. The missions are all a little different and there is a story. I'd give this game an 8 out of 10.. This is one of the best routes I have ever purchased! The scenery is fantastic, has good amount of rolling stock and two great detailed locomotives! This is a must have for any train sim user!. Delightful point-and-click adventure. The graphics, setting (bar the steampunk side) and character remind more than fleetingly of the old Gabriel Knight (Sins of the Fathers, not the sequels). The creators managed to create an effortlessly sympathetic main character, which is not easy, and a nice group of supporting characters.

The puzzles are not that difficult, but they're not frustratingly stupid either, and I like the idea that you have an array of choices to end a case with (even though, of course, only one is correct), with a hint of moral choices to make. Very nice voice acting too. The only thing I'm not too crazy about is the alternate steampunk universe the game is set, not because I don't like steampunk per se, but because I find it slightly superfluous; I think the game could have easily worked in the real world setting with few adaptations. Still, it doesn't bother either, so it doesn't affect the enjoyable experience of the game in the slightest.. Honestly ? I thought it could be fun but, didn't this game literally rip off gameboy mariokart sound fx ? I hoped the gameplay would be correct but actually it doesn't run so well and returns always to a small size when you maximise it without using full screen mode. I knew the risks, it's fine I got it on sales. Don't get me wrong, I love pixelish retro games when they are well made (depending on my own tastes of course).. The game description pretty much tells you what you need to know. It's basically a multimedia art installation, brought into VR. If you like modern art and would happily pay admission to an art museum, then it's probably worth a buck. No need to worry about little kids ruining it for you, either. Unless you have little kids in your house. Why would you do that to yourself? I just don't understand some people. ;-)

Happy new year. Some say this game can be completed in an hour. Yes, but how long did you spend on papers please? sure, one ending can be gotten in an hour, but what about the achievements, the endless combinations of endings, and the development of the characters? those are the things that can make you spend hours of a game like this. this game also has likeable characters and at times will make you love or hate the loyalists, making them seem real to you. also, its more immersive if you play this game at a desk with headphones. which is another thing this game has going for it, the soundtrack.

The only cons in my mind is the fact that you don't take care of your family, and it feels like the enemy, whoever you chose it to be, doesn't seem to affect you as the character, but more those around you. it does, however, affect you as a person. ouch. ouch, my feelings, oof.

+Monster girls cute.

+I have 7 daughters now.

+Easy to get a hang of, and if you have trouble still, there's a guide book you can click on whenever.

+Multiple endings, but you have pretty good control on which ending you get. (meaning: you don't get screwed up and can't go back, unless you get a "bad end".)

-You kill the monster girls. :( or. well. not I guess. if you want to.

-Kinda short. I enjoyed it though, so, I guess I don't mind. It only took me about 7 hours to beat with some extra endings. I'm not a full completion kind of person, but I think if I wanted to get all the stuff it might take a few more hours only.

-Sometimes the things you do feel tedious.

-Would have liked to know about the villagers a bit more. A little was added with the DLC but, eh.

tips:

~If you don't like repetitive things, this game might not be for you.

~Make at least two save files. One for doing the true end, and one for doing the extra endings.

~The game warns you, but there are dark themes in this game, so if you don't think you can handle it, maybe it's not for you..

will break your PC. This game is the closest I've ever seen to the guild simulator I've always wanted to play. It's simple, it's fun, it's short. I wish it was a complex resource management game with the depth and lore it deserves, but that's unfair.

But it wasn't promised to be the next blockbuster hit. It's less than five bucks. And I enjoyed it until the endgame. Other reviewers I feel are being too harsh: This was advertised as a "short and sweet" game you can finish in a few hours. And it delivered it precisely. I would recommend this game, even if only to drum up interest in an even better one.. What we have here....

It's an Action Western, and even VR.

What could be better ?

From pluses it is possible to allocate:

Nice graphics,

Many kinds of weapons,

Beautiful location.

From annoying shortcomings is the lack of multiplayer, but I think the developers ever it definitely will add it, because the game is still in early access.

Wish the project good luck in the further development.

Extremely I recommend to buy!
